

# Blower REH-1,5E heating element

## Heating element for blower REH-1.5E

It is probably a common problem, especially in wet climates: drying a rented out bouncy castle or inflatable attraction after heavy rain. This heating element is an ideal device, it increases the air temperature by 5 to 7 degrees and is to be used in combination with our REH 1.5E blower, a standard item in our product range. This is a perfect way to dry the inflatable even faster!

## Heating element, obviously with safety feature

The secret to this heating element? Increasing the air temperature allows the air to absorb about 30% more moisture, which speeds up the drying time: the inflatable dries more easily on the inside. It goes without saying we have considered the safe use of the device, which means it automatically stops when the heating element reaches a temperature of 50 °C.

## This top device also comes with a 1-year warranty

As you have come to expect of JB-Inflatables, we exclusively go for the best products. So our blower accessories, such as this heating element, are no exception! That is why we confidently provide a 1-year warranty for this product.

## JB: 15,000 enthusiastic customers in 15 years

JB has been in business for 15 years now. For 15,000 people around the world, we have delivered items to help them celebrate festive occasions. Our team of designers, developers and logistic staff want to make it a unique experience for everyone. And with us you are always assured of our service and high-quality delivery! It is for good reason people call us 'creators of greatness'!
