

Bravo OV6 Air Pump

High-pressure blower for inflatables

Are you looking for a blower with extra capacity that is needed to inflate, for instance, bouncy castles or other inflatables? One that can handle any size whatsoever? This Bravo OV6 air pump is capable of blowing no less than 1600 litres of air per minute into an inflatable, which means it is fully inflated in less than no time. And the beauty of it is this air pump can also be used to 'draw' air from your inflatable item to empty it.

The blower capacity is 600 Watt.

Decide for yourself which air pressure you need

This high-pressure blower makes it very easy to set the right pressure for the inflatable. Insert the blower hose into the valve of the bouncy castle or other inflatable and let air in until the desired pressure. The air gauge can be used to enter the pressure you need.

This blower can achieve a maximum pressure level of 17 mbar. The Bravo OV6 is connected to the regular mains supply and the device weighs no more than 1.3 kilograms.

A 1-year warranty on a premium quality blower

All devices we can supply come with a 1-year warranty as a standard, because we want you to be assured of purchasing a top product. It goes without saying we also provide our standard JB warranty for devices for this high-pressure blower.

15,000 enthusiastic customers for JB-Inflatables

Our company has been in business for 15 years now. During these years, we have delivered items to help 15,000 people around the world celebrate parties and events.
